

SWG CASE STUDY

DEVELOPING A CARBON REDUCTION PLAN.

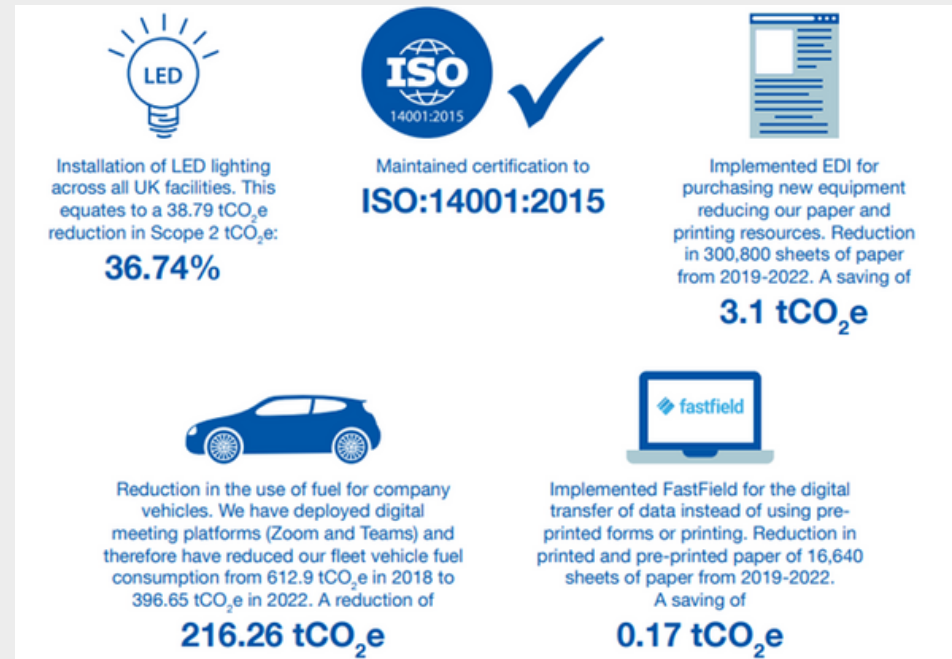

About KARL STORZ Endoscopy (UK) Ltd

Since its beginnings in 1945, the KARL STORZ family company has grown into a global manufacturer and distributor of endoscopes, medical instruments, and devices. With more than 15,000 products for human and veterinary medicine, Karl Storz help save lives, detect cancer at an early stage and enable minimally invasive surgery. Read more about the company [HERE](#).

KARL STORZ Endoscopy (UK) Ltd is committed to achieving Net Zero emissions by 2040. So last year, using 2018 figures as a baseline, they set about to measure their Scope 1, 2 and 3 and total emissions, and how it compares to the latest, 2022 measurement of the same.

Their carbon reduction plan was published in March 2023. In addition to the recruitment of a dedicated sustainability champion into the business, it reported on a series of practical environmental management measures and projects completed or implemented since the 2018 baseline, including:

Moving forward their plan includes multiple sustainability initiatives, including a carbon reduction target (by 28% by 2027), adopting a Carbon Accounting Engine; expanding their solar array at their Slough office, increasing the number of EV charging points in the office car park, and incentivising their use; reviewing the corporate fleet for conversion to a hybrid or EVs where possible; achieving 0% waste to landfill and implementing a digital archiving programme.
