ARTIFICIAL INTELLIGENCE AS A FORCE FOR GOOD
Friday 15th March 2024

Sharon is a prominent figure in technology and cybersecurity, currently leading the division at Heathrow Airport as part of the Senior Leadership Team.
With over 25 years of experience, she is responsible for the technology masterplan, driving data and digital transformation, and ensuring IT excellence across Heathrow's operations. Her career is marked by significant roles, including serving as Chief Information Officer on Card Factory's Executive Board, where she spearheaded IT transformation and cybersecurity enhancements.

Sharon's diverse background covers strategic positions at Upfield B.V., Post Office, Ann Summers, Avon Cosmetics, and GlaxoSmithKline plc, showcasing her expertise in digital business transformation, data enablement, and leading high performing teams. Academically accomplished, she holds two Master's degrees in Business Administration and Law from the Open University, underscoring her profound knowledge and multidisciplinary approach to technology leadership.

Sharon lives in Essex. She is married with one child and 3 stepchildren.
