

Effective from 16/10/2024

New procedure for UAE documents legalisation

Legalisation of Certificates of Origin and Invoices for the UAE

The United Arab Emirates Ministry of Foreign Affairs recently launched their new electronic legalisation platform, eDAS 2.0. This platform is for the digital attestation of documents relating to goods being imported into the UAE. This attestation is restricted to the following documents:

- Arab British Certificates of Origin
- Commercial Invoices

eDAS 2.0 allows **only** the consignee in the UAE to upload these documents. Companies registered in the UAE must register using the following link:

<https://edas.mofa.gov.ae/regnv2/#/>

As a result, all Certificates of Origin and Commercial Invoices for the UAE will now be processed as certification only and the responsibility of legalising the Arab British Certificate of Origin & Commercial Invoice will fall on the consignee in the UAE.

The process for Other Document (ODs) remains unchanged and will continue to be processed as certification and legalisation.
