

Life Sciences & Healthcare

TVCC INDIA DESK

India is one of the world's largest producers of pharmaceuticals and vaccines, while the UK is a global leader in biotech and medical innovation. Together, the countries can drive breakthroughs in health, life sciences, and patient care.

Why This Sector Matters

- India supplies **60% of global vaccines** and is a **major pharma exporter**.
- UK **leads in genomics, biotech, and advanced therapeutics**.
- Growing demand in India for **healthcare innovation and medtech**.

Opportunities for UK Businesses

- Export **cutting-edge medtech** and **diagnostic devices**.
- Collaborate on **R&D in biotech and pharmaceuticals**.
- Provide **healthcare consultancy** and **training services**.

Opportunities for Indian Investors

- Invest in UK biotech clusters like **Cambridge and Oxford**.
- Access **advanced clinical trial** infrastructure.
- Build partnerships with **UK NHS suppliers and medtech firms**
