

**Matthew Martin, Managing Director, Oxford NanoScience Limited**

Matthew has been part of Oxford NanoScience Limited for over 7 years. He first joined as Senior Director of Engineering, responsible for leading the redevelopment of the company's product line and re-establishing the long term product development roadmap and the last 2 years as Managing Director. Matthew is a Chartered Mechanical engineer with nearly 30 years of industrial experience, 20 years of this in the semiconductor industry in plasma material processing equipment involved in the manufacturing of multiple substrate materials, including 8 years as the Head of Abatement Engineering at Edwards.

Matthew has spent the last 20 years in senior roles building engineering teams and taking constructive steps to turn policy into practical actions. Matthew has a deep interest in design for sustainability, energy efficient product development and modular product design. More recently has also taken sites through a full business process transition delivering process efficiency and improved working culture.
